Custom Design & Build

Displayworks innovative design capabilities have won dozens of best stand awards for our clients. Using state of the art computer technology, namely (CAD) and Autodesk Viz we are able to customise your stand or display to maximize the presentation of your product.

Off The Shelf Designer Stands

These are all individually designed using existing components from our display inventory. The main purpose of the concept is to put a custom designed look within the means of 'off the shelf' budgets.

Displays & Merchandisers

Most companies who have a product or service to promote at an exhibition also need to display that same product elsewhere on a permanent basis. Displayworks has responded to this need by setting up an in-store display and merchandiser division. We are able to manufacture in-house using a wide range of materials.

Signage & Graphics

Displayworks has a fully computerised in-house commercial sign division, this is a competitively priced full service signage operation producing a complete range of graphics and signage from small local business graphics through to large exterior signs for nationwide corporate businesses i.e Rebel Sport, Briscoes, Mitre 10 and Foodtown
